RocCity Park UPDATE #2
December 8, 2008

The mission of the *RocCity Skate Park City-Community Partnership* is to build a skate park in the City of Rochester by selecting a location, raising \$500,000 for the initial construction, and developing a partnership to manage the skate park once it is built. This is a volunteer effort, so 100% of donated money goes directly to the skate park.

The last update we sent to you was October 8, 2008 and at this time we had raised \$2,398. The pace of our fundraising effort is moving along steadily. Keep in mind the following:

- There is currently a proposal pending with New York State Senator Joseph Robach and the Tony Hawk Foundation (\$275,000 total pending)
- A company that builds skateparks approached us and will match the Tony Hawk Foundation grant 1:1 if it is awarded
- Special events, which currently account for 25% of our funding, will continue so watch for *Beats for Boards* events, among other special events
- Individual donations and change collection appear to be a steady stream of funding for the project
- We have reached a level where we are beginning to look into interest-bearing opportunities for the money raised
- Most important, more and more people, groups, and corporate sponsors are joining the cause so the monthly trend is increasing rapidly. The monthly deposits appear to be doubling from around \$500 per month to over \$1,000 per month the past couple of months.
